Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over:

JP 2000-289168 (JP '168),

in view of JP 2002-207119 (JP '119).

JP '168 discloses a polyester film comprising a coating layer and a release layer, wherein said coated film has the recited extractable oligomer content. (entire document, e.g., abstract; paragraphs 5, 11, 24, 27, etc.) However, the reference does not explicitly disclose films with the recited orientation angle.

JP '119 discloses that it is well known in the art to utilize films having an orientation angle of 10 degrees or less in order to facilitate visual inspection and to avoid interference when utilized in optical applications (e.g., polarizers, etc.) (e.g., abstract; paragraph 21, etc.)

It would have been to one of ordinary skill in the art at the time the invention was made to use films with low orientation angles in the coated films of JP '168 in order to facilitate quality control and its use in optical and/or display applications. One of ordinary skill in the art would have used known techniques to minimize the presence of defects in the coating layer

Art Unit: 1773

(claim 1) in order to increase uniformity of layer properties and to avoid undesirable visual artifacts which used in display or optical devices and structures.

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vivian Chen whose telephone number is (571) 272-1506. The examiner can normally be reached on Monday through Thursday from 8:30 AM to 6 PM. The examiner can also be reached on alternate Fridays.
